Batteryguard

Fire-resistant lithium-ion battery safe

batteryguard
think safe

Increasingly, batteries from e-bikes and tools catch fire spontaneously while charging. Such a battery fire is very intense and cannot be extinguished. The battery can even explode!

The Batteryguard lithium-ion battery safe contains a battery fire within the safe and prevents the fire from spreading to your property. Batteryguard is based on a safe construction and designed in such a way that a fire and explosion remain inside the safe. In the event of a battery fire, the doors remain closed!

Proven safety with Batteryguard

The Batteryguard XL battery safe was tested during the development of the VDMA 24994 paper. Lithium-ion batteries were subjected to a thermal runaway, resulting in the safe doors remaining closed, even when the batteries became extremely hot and the smoke gases led to explosions. This proves that Batteryguard is a safe choice!

- + **Tested with lithium-ion batteries by MPA Dresden (model XL)**
Meets the requirements of many insurers
- + **Battery fire is kept inside the safe**
Minimal collateral damage to your premises
- + **Poisonous smoke and gasses can be ventilated outside**
If smoke flue is fitted
- + **Personnel are protected**
Alarm center is alerted (when connected)

KeyConductor Electronic key cabinet

Key management is a challenge for many organisations. There's nothing more frustrating than losing important keys.

With the KeyConductor electronic key cabinet, you can automate the issuing and returning of keys. In the Connect Software, you determine who can borrow which key, thereby granting access to certain rooms, vehicles, or cabinets.

The system saves this information and shows who has which key, when it was taken, and when it was returned.

Connects to your existing software

Does your organisation already use facility management software or an access control system? Our developers are happy to help computerise your business processes.

With the help of an API, we can link existing data, such as users or keys, with the Connect software and your existing software. This allows you to continue working in your familiar environment without the need to manually enter data.

We have extensive experience in integrating all common systems, such as TOPdesk, SALTO, SURFconext, and Active Directory.

CapLocker Electronic lockers

With the electronic lockers from CapLocker, you can manage company assets in an efficient and secure way. The intelligent locker system makes it easy and transparent for both administrators and users to lend out company assets such as laptops, scanners, or radios.

Using the Connect software, you can automate the issuing and returning of items. This saves you costs and eliminates the need to spend endless hours on administrative tasks.

The locker system is available in various sizes and modules and can also be used as a lending wall with an integrated reservation platform.

All your data systems connected to each other

Does your organisation already use facility management software or an access control system? We ensure a seamless integration with the Connect software. This allows you to continue working in your familiar environment without the need to manually enter data.

We have extensive experience in integrating all common systems, such as TOPdesk, SALTO, SURFconext, and Active Directory.

The benefits at a glance

- ✓ **Time and cost efficient**
No more time-consuming administrative tasks
- ✓ **Security**
Monitor critical keys and avoid significant consequences of loss
- ✓ **100% visibility**
Complete overview of current events, alerts, and reports
- ✓ **Integration with existing IT environment**
Connects to various applications and common access control systems
- ✓ **Increased flexibility**
24/7 access to keys

The benefits at a glance

- ✓ **Time and cost efficient**
No more time-consuming administrative tasks
- ✓ **Improve your service level**
Make your service desk available 24/7 with a web-based reservation app
- ✓ **100% visibility**
Complete and up-to-date overview of events, alerts, and reports
- ✓ **Integration with your existing IT environment**
Connects to various software systems and all common access control systems
- ✓ **Efficient**
Defects can be reported immediately and items can be recharged directly

SISTEC SWT

Gun Safe

Firearms are best stored in a specialised gun cabinet or gun safe to prevent unauthorised access to the contents. It is also advisable, and in most countries required by law, to store ammunition and firearms separately and to keep the access keys securely stored.

The SISTEC SWT is a certified burglary-resistant gun safe that complies with the latest regulations and is ideal for storing hunting and sports rifles thanks to its flexible holders.

Specifications

- ✓ **Secure storage of your firearms and ammunition in accordance with current regulations**
- ✓ **ECB-S certified burglar resistance in accordance with EN 1143-1 Grade I**
(also available in Grade 0)
- ✓ **Fire resistance standard: DIN 4102**
(not tested)
- ✓ **Standard available with an electronic lock**
- ✓ **Flexible interior layout with various gun racks, a separate lockable ammunition compartment, shelves, and partitions**
- ✓ **Choice of various models and sizes**

SISTEC SE /S

Data safe

Storage media, such as hard- en flash drives and other data carriers, are very fragile and particularly sensitive to heat and high humidity. These media often contain sensitive business information that must not be lost. It is therefore essential to store these data carriers in a specialised fire- and burglary-resistant data safe.

The SISTEC SE data safe has been tested according to the most stringent fire resistance standard specifically aimed at protecting fragile data carriers. The safe offers up to 120 minutes of fire protection and features a special finish that makes it completely waterproof. Additionally, the SISTEC SE provides certified protection against burglary.

Specifications

- ✓ Secure storage of your data and media
- ✓ ECB-S certified fire resistance according to EN 1047-1 S120DIS
(120 minutes of protection for data on magnetic media)
- ✓ ECB-S certified burglar resistance in accordance with EN 1143-1 Grade II
(also available without burglary resistance certification)
- ✓ Flexible interior layout with lockable inner compartments, shelves, and/or pull-out drawers
- ✓ Equipped with emergency locking
- ✓ Also available with an electronic lock
- ✓ Choice of various models and sizes

Chubb safes Vega

Burglary-resistant safe

The Chubb safes Vega Grade 5 is a compact and certified safe, specially designed for use in homes and the retail sector.

This highly burglary-resistant safe weighs less than 300 kg and can be easily placed in small spaces such as built-in cupboards, under counters, and in furniture.

Specifications

- ✓ Protection from burglars and fire
- ✓ ECB-S certified burglar resistance in accordance with EN 1143-1 Grade V
- ✓ Fire resistance in accordance with DIN 4102
(not tested)
- ✓ Standard equipped with EN 1300 certified double bitted key lock with 2 keys
(other lock options available)
- ✓ Compact and lightweight safe, ideal for placement in small (built-in) spaces

About the Nauta Group

Since its founding in 1963, the Nauta Group has developed into a leading importer, wholesaler, and manufacturer of security products. With over sixty years of experience, we can proudly call ourselves specialists in locking systems, as well as fire and burglar-resistant safes. Security is our expertise, and we feel most at home in this field.

With locations in both the Netherlands and Germany and a customer base spread across Europe, we are one of the Europe's most comprehensive distributors of mechanical security products.

Own brands and product development

In addition to a wide range of regular brands, we also offer various exclusive Nauta brands. These products are designed and manufactured in-house, with the quality you would expect from a specialist like us. Every product is rigorously tested and certified at both national and European levels.

Our Research & Development department continuously invests in the development of new products, keeping up with the latest trends and technologies. For every problem, we find a solution.

Moreover, we place great importance on bespoke solutions. Thanks to our in-house engineers, we can quickly respond to specific customer needs, from the initial sketch to the delivery of the final product.

Wybe Jan Nauta, MBA | Director Nauta Group

"The Nauta Group is a committed, versatile and inventive family business. Come and visit our Experience Centre in Barneveld and our showroom in Freudenberg to see which solution meets your needs best."

Nauta Security Storage BV

Both Nauta BV and Nauta Security Storage BV are part of Nauta.com. Nauta BV is mainly active in the Dutch and Belgian markets and offers a complete range of locking systems, keys, keyrings, key machines, and safes. Nauta Security Storage BV is the specialist in fire- and burglary-resistant storage solutions with customers in the Netherlands and worldwide.

ORGAMI SISTEC GmbH & Co KG

Orgami Sistec, located in Freudenberg (Germany), is a manufacturer of a wide range of lockers and other industrial furniture made of steel (Orgami) and fire- and burglary-resistant safes (Sistec).

Nauta Connect BV

Nauta Connect offers smart solutions for the distribution and management of keys and company assets through KeyConductor electronic key cabinets and CapLocker smart lockers. The products are seamlessly integrated with the Connect software, which has been developed in-house by the Dutch development team.
